

Procedures and costs: The items below are available at the pre-purchase examination:

Please place a check mark in the boxes provided and **initials** to indicate which services you would like performed at the pre-purchase examination. Items with * are recommended. The more information obtained during the exam, the more complete the report.

***Prepurchase Clinical Examination: \$120.00** The clinical examination begins with a complete physical examination including eyes, skin, oral, external genitalia, etc. and a comprehensive evaluation of the horse's respiratory, cardiovascular, musculoskeletal and gastrointestinal systems. A search on USEF horse report is made and review. Horses will be scan for a microchip, number recorded and if no microchip is found, a microchip will be implanted unless buyer declined it. **(\$50.00 cost of new microchip) _____ Owner declines microchip implant. Initials _____**

***Flexion test and Moving Examination: \$200.00** During the moving evaluation, the horse will be examined at a walk and trot on a firm surface, and lunged, if consider necessary, at the walk, trot and canter in both directions. In addition, flexion of the joints of the forelimbs and hind limbs will be performed. Under the direction of the veterinarian, the horse may be observed under saddle; therefore, we recommend bringing tack to the pre-purchase examination. Anyone who rides the horse will have to sign a waiver and must wear an ASTM approved helmet.

*** Digital Radiographic Examination: Circle the one desire.**

Following the moving examination, the horse will proceed to be radiographed. The following options are available:

A: Complete package \$1,450.00, 42 or more views. A complete set of prepurchase radiographs requires 44 or more views that includes: front feet/ navicular (4 x2), front fetlocks (4 x2), carpus (2 x2), rear fetlocks (2 x2), hocks (4 x2), stifles (2 x2), head (2), cervical vertebrae (3) and dorsal spinous processes (back, 3) and if additional views are required, will be included, as per Dr. Gamboa's discretion

B: Base package \$800.00, 24 views (front feet with navicular views 4x2, front fetlocks 4x2 and hocks 4x2),

C: As needed, \$45.00 per view/per radiograph or so called "Red Flags" radiograph.

We can take as many or as few radiographs as buyer desire. Just keep in mind, the more complete the study, the more information you will get. As part of any prepurchase study, the radiographs will be store in the cloud and will be available for the next 5 years. A link giving you complete access to the radiograph exam will be mailed to you, together with the final report. You can forward this exam to whom you wish to do so. .It is standard in our

comprehensive prepurchase examination, to remove the horse's front shoes to obtain the best quality radiographs of the front feet. In some occasions, if the views are appropriate, the shoes may not be removed. Exceptions will need to be discussed with the veterinarian performing the examination. We do not provide a farrier services, and arrangements to have the shoes replaced will need to be made elsewhere.

Radiographic findings are described in five grades. Grade 1 (**good**) and grade 2 (**satisfactory**) are consider **ACCEPTABLE**.

Grade 3 (**poor**) is consider acceptable carrying and **INCREASED RISK**. Grade 4 or 5 are **NOT ACCEPTABLE**.

Radiologic findings are considered acceptable only when clinical findings justify this.

More radiographs, such as the elbows and shoulders, or different views, may be indicated depending on the clinical and moving evaluation. They can be submitted for further evaluation and instant decision making in consultation with your veterinarian if so desired.

Early radiographs (from earlier vet exams or other reasons) are great help when available. There will be an additional charge for interpretation depending the number of radiographs.

Digital Ultrasound examination \$250.00 one leg, \$350.00 two legs.

Indicated if swelling, thickening, or sensitivity of the tendons or ligaments is palpated, or any concern of soft tissue is noticed.

*** CBC/ Chemistry (Blood work): \$167.79**

A complete blood count (CBC) is one of the most common blood tests performed to help diagnose various infections or other abnormal conditions of the body. A chemistry additionally provides information concerning muscle enzymes, kidney, liver, and other organ function. Fibrinogen and Thyroid levels are also run. (Please allow 1-3 working days to get the results).

* **Drug Screen: \$350.00** **Stat: \$300.00 additional, Results available in 1-2 days**

* **Drug Screen with Firocoxib (Equioxx): \$510.00**

Strongly recommended. The drug screen blood work is send priority overnight; results are often available in 2-5 working days, depending on the day sent. The test includes any behavioral modification drugs, NSAID=s, steroids, (painkillers, antiinflammatory drugs) and certain metabolites. The test will report the presence or absence of drugs, not quantity. If a qualitative confirmatory and/or quantitative test is desire, additional cost (\$250 for qualitative confirmatory and \$400.00 for quantitative confirmatory) will incur. We do not recommend storing serum for drug screens to be performed at a later date, as the testable medications may deteriorate in the sample and not provide accurate results. Urine sample will detect some medications for longer times. If desire to run a urine sample, no extra charge will be added, but it is the responsibility of the buyer/buyer agent to collect the sample. I will provide the necessary collection tubes and instructions.

***Coggins Test: \$50.00 (Electronic Coggins).** A requirement unless the seller can provide our clinic with a current copy dated within the past 6 months. Please give new stabling information:

Any additional tests desired _____ \$ _____

Endoscopy of Upper Respiratory Tract: \$200.00

TIP: Discuss with buyer, before the start of the exam the release of any medical findings related to this examination.

Seller or seller’s agent signature

Date

Tip:

If you are scheduling a pre-purchase use a purchase agreement and ensure you have a provision that dictates the SELLER will reimburse the full amount of the vetting if the horse shows any positive medications on a drug screen. Make sure the Seller signs that agreement BEFORE any vetting. Moreover, ensure the Seller or Seller's agent attest at the START of the vetting that no medications have been provided to the equine and if so, the vetting is stopped and scheduled for another day. You cannot rely on any vet check that has drugs on board. Consider having the vet present, discuss and sign an agreement.

Another option is for the seller to pay for a new exam and a new drug screen, in case the drug screen is positive to any medication.

For use and fill by the veterinarian performing the exam.
